

► What is the OASIS STAR Registry?

The OASIS Po**ST**-Trial P**A**tient R**E**gistry (STAR Registry) is designed for women experiencing vasomotor symptoms (VMS)—also known as hot flashes and night sweats—due to menopause, who have previously participated in an OASIS study.

► Purpose of the Registry

Vasomotor symptoms are common symptoms of menopause transition, affecting an estimated 60% to 80% of women. The median total duration of VMS is approximately 7.4 years. Participation in this registry is voluntary and valuable in advancing the understanding of treatments and medications for women experiencing VMS due to menopause. Analyzing the data gathered may provide insights to improve care and future treatment options for menopausal women.

► What is involved?

Except for your time, there is no cost to you. This registry study does not involve any treatments, medications or interventions, so there are no expected risks to your health. You can choose not to participate and may stop at any time without penalty. If you choose to join the OASIS STAR Registry, you will be asked to consent to both phases of the registry.

Phase 1: Completing a short, web-based survey about your VMS and treatments prior to joining an OASIS study

Phase 2: Consenting to share your de-identified medical data for analysis over the six months following your participation in an OASIS study

► Survey:

The online survey should take no more than 10 minutes to finish and will ask you questions about your VMS due to menopause and treatments prior to joining one of the OASIS studies. Your answers will be reported anonymously. Your name will not be used in any report.

► Medical Data Analysis:

As part of your agreement to participate in this registry, you are consenting to share your de-identified medical data (pharmacy and medical claims) for analysis. This will help Bayer, the sponsor of the Registry, evaluate VMS treatment patterns and healthcare usage over the six months following your participation in an OASIS study.

► Confidentiality

Throughout your participation in the Registry, all privacy guidelines will be strictly followed to ensure no personal information is disclosed.

► Compensation

Participants will receive a \$50 gift card as compensation for your time.

► In Support of Research

Your participation in the OASIS STAR Registry helps researchers gather valuable information to better understand VMS. We appreciate your willingness to share your experiences and support medical research through this registry study.
